2012 PSYCHOLOGY (PG Standard)

Time Allowed: 3 Hours]

[Maximum Marks: 300

PHPG

Read the following instructions carefully before you begin to answer the questions.

IMPORTANT INSTRUCTIONS

- 1. This Booklet has a cover (this page) which should not be opened till the invigilator gives signal to open it at the commencement of the examination. As soon as the signal is received you should tear the right side of the booklet cover carefully to open the booklet. Then proceed to answer the questions.
- 2. This Question Booklet contains 200 questions.
- 3. Answer all questions.

- 4. All questions carry equal marks.
- 5. You must write your Register Number in the space provided on the top right side of this page. Do not write anything else on the Question Booklet.
- 6. An Answer Sheet will be supplied to you separately by the Invigilator to mark the answers. You must write your Name, Register No., Question Booklet Sl. No. and other particulars with Blue or Black ink Ball point pen on side 2 of the Answer Sheet provided, failing which your Answer Sheet will not be evaluated.
- 7. You will also encode your Register Number, Subject Code, Question Booklet Sl. No. etc. with Blue or Black ink Ball point pen in the space provided on the side 2 of the Answer Sheet. If you do not encode properly or fail to encode the above information, your Answer Sheet will not be evaluated.
- 8. Each question comprises four responses (A), (B), (C) and (D). You are to select ONLY ONE correct response and mark in your Answer Sheet. In case, you feel that there are more than one correct response, mark the response which you consider the best. In any case, choose ONLY ONE response for each question. Your total marks will depend on the number of correct responses marked by you in the Answer Sheet.
- 9. In the Answer Sheet there are **four** brackets [A] [B] [C] and [D] against each question. To answer the questions you are to mark with Ball point pen ONLY ONE bracket of your choice for each question. Select one response for each question in the Question Booklet and mark in the Answer Sheet. If you mark more than one answer for one question, the answer will be treated as wrong e.g. If for any item, [B] is the correct answer, you have to mark as follows:

[A] [C] [D]

- 10. You should not remove or tear off any sheet from this Question Booklet. You are not allowed to take this Question Booklet and the Answer Sheet out of the Examination Hall during the examination. After the examination is concluded, you must hand over your Answer Sheet to the Invigilator. You are allowed to take the Question Booklet with you only after the Examination is over.
- 11. Failure to comply with any of the above instructions will render you liable to such action or penalty as the Commission may decide at their discretion.
- 12. Do not tick-mark or mark the answers in the Question booklet.
- 13. The last sheet of the Question Booklet can be used for Rough Work.

SEAL

1. Select the most unique answer. A persistent belief that is contrary to reality in the absence of other characteristics of schizophrenia is a major feature of (A) Schizo affective disorder (B) Schizophreniform disorder Delusional disorder (D) Schizotypal disorder 2. Consider the statements: Panic attacks may be unexpected without any warning. ii. Panic attacks may be situationally bound. iii. Panic attacks may be situationally predisposed. Panic attacks may be representing the alarm response of real fear. Of the statements, (A) i alone is correct. (B) i and ii are correct. All are correct. (C) i, ii and iii are correct. 3. Intelligence Quotient, as a ratio between MA & CA, was first used by (A) Binet (B) Wecshler (C) Simon Terman Assertion (A): Intermittent reinforcement of responses contributes to the production and maintenance of extremely stable behaviour. Reason (R): Intermittent reinforcement tends to make a response more resistant to extinction. Select your answer according to the coding scheme given. Both (A) and (R) are true, (R) is the correct explanation for (A). (B) Both (A) and (R) are true, but (R) is not the correct explanation for (A). (C) (A) is true, but (R) is false. (D) (A) is false and (R) is true. 5. David Wechsler has divised tests of intelligence for (A) Adults and Primary school children (B) Adults and Preschool children (C) Adults and children Adults, children, Preschool and Primary school children Assertion (A): People with panic disorders have had one or more panic attacks and are 6. very anxious and fearful about having future attacks. Reason (R): Panic attacks always occur in the same situation, which may lead to extreme avoidance of triggering persons, places or events. Select your answer according to the coding scheme given below: (A) Both (A) and (R) are true, (R) is the correct explanation for (A). Both (A) and (R) are true, (R) is not the correct explanation for (A). **(B)** (C) (A) is true, (R) is false.

(D) (A) is false, (R) is true.

24.	The theory that views human beings as beset by two opposing drives, notably the urge to fuse or merge with another, countered by a contrary urge to remain individual and separate, is
	(A) Humanistic theory (B) Behaviouristic theory
,	Psycho analytic theory (D) Gestalt theory
25.	Consider the following statements.
	Assertion (A): Tardine Dyskinesia is an extrapyramidal symptom which involves involuntary movements of the tongue, face, mouth or jaw.
	Reason (R): Tardine Dyskinesia results from long term use of high doses of antipsychotic drugs.
	Select your answer according to the coding scheme given below: A) Both (A) and (R) true, (R) is the correct explanation for (A).
	(B) Both (A) and (R) are true, but (R) is not the explanation for (A).
	(C) (A) is true, (R) is false.
	(D) (A) is false, (R) is true.
26.	Assertion (A): Source traits promise to be the real structural influences underlying personality.
	Reason (R) : Surface traits are produced by the interaction of source traits.
	Select your response according to the coding scheme given:
	(A) Both (A) and (R) are true, (R) is the correct explanation for (A).
,	Both (A) and (R) are true, but (R) is not the correct explanation for (A).
	(C) (A) is true, (R) is false.
	(D) (A) is false, (R) is true.
27.	This intervention for organizational development is more task-directed than sensitivity training.
	(A) Intergroup development Process consultation
	(C) Survey feedback (D) Team building
28.	The design, which is used only when randomization is not feasible and also which provides a less degree of control, is
	(A) Qualitative design Quasi-experimental design
	(C) Pre-experimental design (D) True experimental design
29.	Assertion (A): In confluence learning a behaviour or attitude simultaneously satisfies more than one goal.
	Reason (R) : One attitude comes to be linked to several sentiments and one sentiment to several ergs.
	Select your response according to the coding scheme given:
	(A) Both (A) and (R) are true, (R) is the correct explanation for (A).
9	Both (A) and (R) are true, (R) is not the correct explanation for (A).
	(C) (A) is true, (R) is false.
	(D) (A) is false, (R) is true.
