2016

Paper I FISHERIES SCIENCE (Degree Standard)

Time Allowed: 3 Hours]

[Maximum Marks: 300

Read the following instructions carefully before you begin to answer the questions.

IMPORTANT INSTRUCTIONS

- 1. This Booklet has a cover (this page) which should not be opened till the invigilator gives signal to open it at the commencement of the examination. As soon as the signal is received you should tear the right side of the booklet cover carefully to open the booklet. Then proceed to answer the questions.
- 2. This Question Booklet contains 200 questions. Prior to attempting to answer the candidates are requested to check whether all the questions are there in series without any omission and ensure there are no blank pages in the question booklet. In case any defect in the Question Paper is noticed it shall be reported to the Invigilator within first 10 minutes.
- 3. Answer all questions. All questions carry equal marks.
- 4. You must write your Register Number in the space provided on the top right side of this page. Do not write anything else on the Question Booklet.
- 5. An Answer Sheet will be supplied to you separately by the Invigilator to mark the answers.
- 6. You will also encode your Register Number, Subject Code, Question Booklet Sl. No. etc. with <u>Blue or Black ink Ball point pen</u> in the space provided on the side 2 of the Answer Sheet. If you do not encode properly or fail to encode the above information, action will be taken as per commission's notification.
- 7. Each question comprises four responses (A), (B), (C) and (D). You are to select ONLY ONE correct response and mark in your Answer Sheet. In case you feel that there are more than one correct response, mark the response which you consider the best. In any case, choose ONLY ONE response for each question. Your total marks will depend on the number of correct responses marked by you in the Answer Sheet.
- 8. In the Answer Sheet there are four circles (A), (B), (C) and (D) against each question. To answer the questions you are to mark with Blue or Black ink Ball point pen ONLY ONE circle of your choice for each question. Select one response for each question in the Question Booklet and mark in the Answer Sheet. If you mark more than one answer for one question, the answer will be treated as wrong. e.g. If for any item, (B) is the correct answer, you have to mark as follows:

- 9. You should not remove or tear off any sheet from this Question Booklet. You are not allowed to take this Question Booklet and the Answer Sheet out of the Examination Hall during the examination.

 After the examination is concluded, you must hand over your Answer Sheet to the Invigilator. You are allowed to take the Question Booklet with you only after the Examination is over.
- 10. The sheet before the last page of the Question Booklet can be used for Rough Work.
- 11. Failure to comply with any of the above instructions will render you liable to such action or penalty as the Commission may decide at their discretion.
- 12. Do not tick-mark or mark the answers in the Question booklet.

1.	The I	black clam is scientifically written as
	(A)	<u>Perna Viridis</u>
٠.	(B)	Pinctada fucata
	500	Villorita cyprinoides
٠	(D)	Crossostrea madrasensis
2.	The f	family that have spines on their skins are called as
,	(A)	Molidae Diodontidae
	(C)	Cynoglossidae (D) Triacanthidae
3	The	carapace with longitudinal carinae is present in
	(A)	<u>Metapenaeus</u> (B) <u>Penaeus</u>
	(C)	Acetes Hetero carpus
. ,		
4.	The	shortest guts in fishes are observed in
	(A)	Herbivorous species
	0	Carnivorous species
-	(C)	Omnivorous species
	(D)	Detritivores
	,	-
_	mb.~	and untion process of clusose from lipids and aminoacids is cal

 ${\bf Metabolism}$

Glyconeogenesis

(B)

(D)

Glycolysis

Deamination

6.	The call		of the ovo-t	estis mature at the same time in	fishes i
	(A)	Synchronous hermaphroditism			
		Successive hermaphroditism			
	(C)	Protandry		•	
	(D)	Protogyny	•		
				,	
5 .					
7.	The	osmolarity of the clasmobranch p		•	
		Trimethylamine oxide	(B)	Chloride ions	
	(C)	Magnesium ions	(D)	Sodium ions	
					•
8.	(a)	Magur is an obligatory air breafish.	athing fish	while Singhi is a facultative air br	eathing
	(b)	Magur cannot live in oxygen de	ficit water.	·	
	(A)	(a) is wrong and (b) is right			•
	(2)	(a) is right and (b) is wrong		• *	
	(C)	Both are wrong			•
•	(D)	Both are correct	•		
		•			
9.	The j	presence of the pigment 'Melanin'	in fish aids	· ;	
		Light and Dark Adaptation	(B)	Swimming	
	(C)	Light reception	(D)	Focussing	
		•			. ,
					•
10.	Mạny due t		particularly	pelagic fishes like sardines have co	llapsed
	(A)	Illegal fishing		•	
	(B)	Growth over fishing			
	50	Recruitment over fishing		•	
1	(D)	Economic over fishing			
SIFS	/16		4		=

- Phi-prime in fish population dynamics refers to
 - (A) mortality rate of the fish
 - **(B)** . survival rate of the fish
 - growth rate of the fish (C)
 - overall well being of the fish
- The parameter that decides the slope of the growth curve of a fish is 12..

Μ

- The longivity of a fish is related to the Instantaneous Natural Mortality Coefficient by Paul'y 13. as follows
 - $t_{\text{max}} \Omega \frac{4}{K}$ (A)

 $t_{
m max}\,\Omega\,rac{2}{K}$ (C)

- (B) $\cdot t_{\max} \underline{\Omega} \frac{5}{K}$ $t_{\max} \underline{\Omega} \frac{3}{K}$
- The term L₂₅ refers to the length at which the percentage of animals vulnerable to a fishing 14. gear is
 - 25%

(B) 75%

(C) 20%

- 10%
- Among the following which pond is connected with sewage fish culture? 15.
 - (A) Nursery pond

Oxidation pond

(C) Brooder pond

- Quarantine pond
- 16. Sewage fed fisheries is more prevalent in the state of
 - Kerala (A)

(B) Tamil Nadu

- West Bengal

Andhra Pradesh

17.	The	disease caused in fish	es due to sur	persaturati	on of nitroge	n or oxygen	in water	is	
	(A)	Alkalosis		,					
	(B)	Acidosis	•						
	101	Gas bubble disease			,

22.		ral polyploidy has bee	n observed i	n the follov	ving fish		•		
	(A)	Big head carp		(B)	Silver carp		•		
	(C)	Grass carp			Common car	rp		-	

23.	Cons	sa laha is commonly called as		•,	•
	(Å)	Kissing gourami	(B)	Three spot gourami	
	(C)	Mosaic gourami	1	Dwarf gourami	•
		· · · · · · · · · · · · · · · · · · ·		, .	
• •	D 1		7		
24.	Red	tailed black shark is scientifically calle	ed as		
•	500	<u>Labeo bicolor</u>	- (B)	<u>Labeo bata</u>	
	(C)	Labeo rohita	(D)	<u>Labeo calbasu</u>	•
	T .1	1.1.101, .,.,.			
25.	In th	e biological filter, nitrite is converted i	nto		
	(1)	Nitrate	(B)	Ammonia	
•	(C)	Ammonium	(D)	Nitrogen	
0.0	ant .		•		
26.		fish which shows parental care is			
	(A)	Guppy		Fighter fish	
	(C)	Sword tail	(D)	Tiger barb	•
	•		•		
o#	(13) ₋ _ 4				
27.	ine	following ingredient added to enhance		•	
		carotenoids	(B)	legumes	· ·
•	(C)	sugars	(D)	gelatin	• •
	. ,				
28.	The	ornamental fish with the modified male	o ronr	oductive organ is	
20.		•			
	(A)	Gold fish	(B)	Koi carp	
•		Guppy	(D)	Arowana	
	•				•
29.	The 1	mode of reproduction exhibited by moll	v fish.	a popular ornamental fi	sh is
	(A)	Viviparity	,,	Ovoviviparity	
	(C)	Oviparity	(D)	Protandrous	
	(\mathbf{O})	OATPULLO	(D)	Tionninions	

30.	The botte	•	quatic macr	o plant with roots but not anchored to the
	(A)	Eichhornia crassipes	· (B)	<u>Vallisneria</u> sp.
	(C)	<u>Hydrilla</u> sp.	(D)	
31.	The	freezing point of sea water with	a salinity of	35% is
	(14)	-1.91°C	(B)	0°C
	(C)	4°C	(D)	–5° C
32 .	Whic	ch of the following marine pelagi	c division is	the dim-light zone?
	(A)	Epipelagic zone		Mesopelagic zone
,	(C)	Bathypelagic zone	. (D)	Abyssopelagic zone
		<i>,</i> '		
	(A) (B) (D)	Sandy intertidal beach Muddy shore Rocky shore Sandy-Clayey intertidal shore		
3 4.		aries in arid-regions where the r termed as	ate of evapo	oration exceeds the inflow of fresh water are
	(A)	positive estuaries		
	D	negative estuaries		•
	(C)	normal estuaries	•	
	(D)	fjords	•	
35 .	Whic	h of the following are the single	celled zoopla	ankton organisms?
	(A)	Copepods	(B)	Chaetognaths
	(0)	Foraminifers	(D)	Bivalve valigers
****		*		

(A)	autotrophs	(B)	heterotrophs		
(C)	saprotrophs	. ` (D)	myxotrophs		
		•		•	
	and the eur	hausids are the chief	consumers of phytopl	ankton.	
مريب	Copepods	(B)	Chaetognaths	•

181.	High	ıly desirable temperature of st	orage of canne	d product	ts is ——		$^{\circ}\mathrm{C}$
	(A)	32		10			
	(C)	28	(D)	26		•	÷
182.	Exte	rnal rusting of the can could be	e avoided by co	oling the	cans to -	····	— °C
	(1)	35	(B)	40			
	(C)	30 -	(D)	37	*		
				•			
•							•
183.		method of exhausting	is the best and	I most re	liable.		
	(A) ·	Mechanical exhaust			•		
	(B)	Steam injection			-		•
	100	Heat exhaust		•			
	(D)	Heat and mechanical exhaus	it .		٠		
					•		
				•	-		
184.	Bland	ching removes	•				
•	(A)	Taste					•
•	(B)	Texture	•	•	•		
	(C)	Flavour					
	(T)	Blood and slime					

- 185. Freezing is accomplished partly by contact at the bottom of the material and largely by the circulation of air by convection currents within the freezer is called
 - (A) Immersion freezer
 - (B) Plate freezer
 - (C) Tunnel freezer
 - Shelf freezer
- 186. It consists of hallow horizontal plates inside which copper pipes are fitted in a zig-zag manner, through which the refrigerant Freon 12 is circulated is called

- (B) Vertical plate freezer
- (C) Tunnel freezer
- (D) Shelf freezer
- 187. It is the process of subjecting the products to heat treatment for a short interval of time prior to processing for freezing
 - (A) Canning
 - (B) Glazing
 - Blanching
 - (D) Icing
- 188. It is a process of dehydration subjecting the frozen material to a very high vacuum when water in its solid state is called as
 - Freeze drying
 - (B) Drying
 - (C) Freezing
 - (D) Glazing

189.	Perc	Percentage of oil in the press cake during fish meal production is							
	(A)	1-2%	(B)	2-3%					
	101	3-4%	· (D)	4-5%					
				•	•				
	•								
190.	Fish meal is rich in ———— amino acid								
	(A)	Leucine	(D)	Lysine					
	(C)	Tryptophán	. (D)	Glycine	:				
				• ,					
191.	The level of free chlorine in process water shall be								
	4	<.2 ppm	(B)	< 1 ppm .					
	(C)	. < 0.5 ppm	(D).	Nil .	•	•			
			•						
192.	Presence of rodents in fish processing premises results in contamination of the product by								
	(4)	<u>Salmonella</u>	· (B)	<u>Vibrio</u>					
	(C)	Aeromonas	(D)	Staphylococcus	<u>^</u> .				
		·			· ·	•			
			•						
193.	The fish that is not responsible for puffer fish poisoning								
٠	(A)	Puffer fish	(B)	Globe fish		•			
	(C)	Toad fish		Star fish					
						•			
			•						
			•	,					

194. The advisory agency in India engaged in facilitating HACCP application is

Bureau of Indian standards

- (B) Department of agricultural marketing
- (C) Export inspection agency
- (D) Food safety and standards authority of India

- 195. When the product to be thawed is placed between two stainless steel plates and current is passed through them is called
 - (A) Dielectric thawing
 - Electrical resistance thawing
 - (C) Vacuum thawing
 - (D) Microwave thawing
- 196. This ice is produced with in 30 minutes of start and the melting time is less compared with other ices
 - (A) Block ice

Flake ice

(C) Rapid ice

- (D) Antibiotic ice
- 197. For laminating the duplex carton micron polypropylene is used.
 - (A) 15

10

(C) 8

- (D) 5
- 198. Freezing causes an initial reduction in the bacteria present in fish to the tune of
 - (A) 50-60%

(B) 40-50%

(C) 50 - 55%

- **60 90%**
- 199. During freezing, enzymatic activity of fish will cease at
 - (A) -8°C

(B) -10° C

(C) -12° C

*(*25) − 15°C

- 200. Omega 3 fatty acids are rich in
 - Sardines

(B) Anchovies

(C) Tuna

(D) Ribbon fish
