Highlights

- Indian Institute of Technology Guwahati is the Organizing Institute for JAM 2023.
- JAM 2023 is open to all nationals (Indian/Foreign) and there is no age restriction.
- JAM 2023 is a Computer Based Test to be conducted in SEVEN Test Papers at the undergraduate level.
- Test Papers will have three objective type of questions: (i) Multiple Choice Questions (MCQs), (ii) Multiple Select Questions (MSQs), and (iii) Numerical Answer Type (NATs) Questions.
- Candidates may appear in ONE or TWO Test Paper(s).
- Candidates qualifying in JAM 2023 are eligible to apply for admission to over 3000 seats in IITs for the academic year 2023-24. No additional evaluation process, such as suitability test or interview is required for admission to the programmes in Admitting Institutes under JAM 2023.
- JAM Scores are also used for admission to programmes such as M.Sc., M.Sc. (Tech), M.Sc.- M.Tech. Dual Degree, MS (R), Joint M.Sc. - Ph.D., M.Sc. - Ph.D. Dual Degree, and Integrated Ph.D in various institutes.
- JAM 2023 Scores will be used for direct admission to around 2000 seats for counselling through CCMN in NITs and other CFTIs.
- JAM 2023 scores are also used by JNCASR, IIPE, IISc, IISER Bhopal, IISER Pune for admission to postgraduate programmes.
- JAM 2023 Examination will be conducted across 109 Cities in India.

Important Dates for JAM 2023

Commencement of ONLINE Application on JAM 2023 Website	September 7, 2022 (Wednesday)
Last Date for Submission of Online Application	October 11, 2022 (Tuesday)
Availability of JAM 2023 Admit Cards for download	January 10, 2023 (Tuesday)
Date of JAM 2023 Examination	February 12, 2023 (Sunday)
Declaration of JAM 2023 Results	March 22, 2023 (Wednesday)

Note: The dates are tentative and subject to change.

1. INTRODUCTION

The Indian Institutes of Technology (IITs) are institutions of national importance established through an Act of Parliament in 1956. The Indian Institute of Science (IISc) is a premier research and teaching institute established in 1909. IISc and IITs are well-known, the world over, for high-quality education in engineering, science, social science, management and research in frontier areas. The aim of these institutes is to build a strong foundation of knowledge, pursue excellence and enhance creativity in an intellectually stimulating environment. The current pace of advancement of technology needs a coherent back-up of basic science education and research. The vibrant academic ambience and research infrastructure at IISc and IITs motivate students to pursue Research and Development careers in frontier areas of basic sciences, social sciences, as well as interdisciplinary areas of science and technology. Further, IISc and IITs are well-equipped with modern laboratories, efficient computer networks and state-of-the-art libraries. The teaching process is structured to promote close and continuous interface between the faculty and the students. A number of financial assistantships are available to SC, ST and other deserving/meritorious students at individual institutes.

Joint Admission test for Masters (JAM) has been established as a benchmark for the undergraduate level science education in the country since 2004 - 05. The objective of JAM is to provide admissions to Post-Bachelor's Degree Programmes and to consolidate Science as a career option for bright students across the country. These programmes offer high-quality education in their respective disciplines, comparable to the best in the world. The curricula for these programmes are designed to provide the students with opportunities to develop academic talent leading to challenging and rewarding professional life. The curricula are regularly updated at the IISc and IITs. The interdisciplinary content of the curricula equips the students with the ability to utilize scientific knowledge for practical applications. These programmes are open to all eligible students irrespective of their nationality. The medium of instruction is English for all the above mentioned programmes.

2. GENERAL INFORMATION

- a) Candidates seeking admission to select postgraduate programmes for the academic year 2023-24 must appear in JAM 2023 Examination. There is no age restriction.
- b) **JAM 2023 Examination will be held on February 12, 2023 (Sunday).**
- c) JAM 2023 Examination will be conducted as a **Computer Based Test** in SEVEN Test Papers, namely, Biotechnology, Chemistry, Economics, Geology, Mathematics, Mathematical Statistics, and Physics. The syllabi are given in [Annexure I](#).
- d) To apply for admission to a desired programme, a candidate is required to qualify in the relevant Test Paper, satisfy the Eligibility Requirements (ERs) and Minimum Educational Qualifications (MEQs) of the respective Academic Programme and any other requirements of the Admitting Institute.
- e) The candidates who have either completed or will be appearing in the final examination of their qualifying degree in 2023 are also eligible to appear in JAM 2023. By qualifying in JAM 2023, candidates can apply for admission subject to the conditions that: (a) all parts of their undergraduate programme shall be completed by the date of registration of the Admitting Institute, and (b) proof of having passed the qualifying degree with required eligibility, as specified by the Admitting Institute, should be submitted by **September 1, 2023**.
- f) Admission shall be given as per All India Rank (AIR) in each Test Paper of JAM 2023, reservation policy of Government of India, and the availability of seats.

- g) JAM 2023 is open to all nationals (Indian/Foreign). For admission, foreign nationals are required to satisfy the rules and regulations of the Admitting Institute pertaining to foreign students. For further details, they are advised to contact the concerned Admitting Institute.

3. ADMISSION PROGRAMMES

JAM Score is used for admission to various postgraduate programmes such as (i) M.Sc., (ii) M.Sc. (Tech.), (iii) MS (Research), (iv) M.Sc. - M.Tech. Dual Degree, (v) Joint M.Sc. - Ph.D., and (vi) M.Sc. - Ph.D. Dual Degree, across multiple disciplines by premier institutes across the country.

Admissions to various programmes using JAM 2023 Score can be divided into two categories:

3.1 Admitting Institutes

JAM 2023 scores will be used for admission to over 3000 seats in postgraduate programmes at 21 IITs for the academic year 2023-24. For candidates satisfying the ERs, MEQs and other necessary requirements, JAM 2023 Scores will be used to admit the candidates **without any additional interview or written test**. Refer [Annexure II](#) and [Annexure III](#) for details on the number of seats, MEQs and various programmes at the participating IITs. [Annexure IV](#) provides the same MEQs and seat matrix in a consolidated format.

Seat Matrix and MEQs in [Annexure – II, III & IV](#) are tentative and are subject to change based on the requirements of the Admitting Institutes. The Seat Matrix and MEQs as published in the Admission Brochure would be final.

3.2 Result Sharing Institutes

JAM scores will be used for admission to over 2000 seats for postgraduate programmes such as M.Sc. and M.A. at various NITs, IIST Shibpur, SLIET, DIAT through Centralized Counselling for M.Sc / M.Sc. (Tech.) Admissions (CCMN). There are no additional written tests or interviews for admission to candidates qualifying JAM and satisfying the eligibility and special eligibility requirements. Refer to <https://ccmn.admissions.nic.in/> for additional details.

In addition, JAM 2023 scores will be used for admission to the four Integrated Ph. D. Programmes and two M.Sc. Programmes at Indian Institute of Science (IISc). IIT Kharagpur will use JAM 2023 scores for Joint M.Sc. - Ph.D program in Chemical and Molecular Biology. IIT Kanpur will use JAM 2023 scores for MS in Economic Sciences. Additional details can be directly obtained from the respective institute.

JAM 2023 scores will also be used by various other institutes such as Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Indian Institute of Science Education and Research Bhopal (IISER Bhopal), Indian Institute of Science Education and Research Pune (IISER Pune), and Indian Institute of Petroleum and Energy (IIPE). Additional details can be directly obtained from the respective institute.

JAM 2023 Organizing Institute will coordinate the admission process of only the Admitting Institutes and the qualifying candidates can apply for Admission after the JAM 2023 examination through <https://jam.iitg.ac.in>. For admissions to Result Sharing Institutes, candidates will have to directly approach the respective Institute / admission body.

4. TEST PAPERS & PATTERN OF TEST PAPERS

JAM 2023 Examination will be conducted in SEVEN subjects, also referred to as Test Papers; Biotechnology, Chemistry, Economics, Geology, Mathematics, Mathematical Statistics, and Physics. The medium for all the Test Papers is English only.

JAM 2023 Examination for all the Test Papers will be conducted as a Computer Based Test (CBT) where the candidates will be shown the questions in a random sequence on a computer screen. The duration of the examination will be of **THREE** hours. Eligible PwD candidates may be given one-hour compensatory time and the assistance of scribe for the examination as per the guidelines of Government of India (Refer Section 9). There will be a total of 60 questions carrying a total of 100 marks. The entire paper will be divided into three sections, A, B and C. All sections are compulsory. Questions in each section will be of different types as given below:

Section - A contains a total of 30 Multiple Choice Questions (MCQs) involving 10 questions of one mark each and 20 questions of two marks each. Each MCQ has four choices out of which only one choice is the correct answer. Candidates can mark their answer by clicking one of the choices. A wrong answer will result in negative marks. For each wrong answer to 1 mark questions, 1/3 mark will be deducted and similarly for each wrong answer to 2 marks questions, 2/3 mark will be deducted.

Section - B contains a total of 10 Multiple Select Questions (MSQs) carrying two marks each. Each MSQ is similar to MCQ but with the difference that MSQ may have one or more than one correct choice(s) out of the four given choices. The candidate is awarded full credit only if all the correct answer(s) and no wrong answers are selected. Candidates can mark the answer(s) by clicking the choice(s). There is no negative marking or partial marking for MSQ.

Section - C contains a total of 20 Numerical Answer Type (NAT) questions involving 10 questions of one mark each and 10 questions of two marks each. For NAT questions, the answer is a signed real number, which needs to be entered using the virtual numeric keypad displayed on the monitor. No choices will be shown for NAT questions. There is no negative marking for NAT.

- In all sections, questions not attempted will result in zero mark. There is no provision for partial marking.
- The candidates are required to select the answer(s) for MCQ and MSQ type questions using the mouse.
- The answer for NAT questions must be entered using a virtual numeric keypad. The keyboard of the computer will be disabled.
- There is a provision for using online virtual calculator. Candidates are not allowed to bring their own calculators.
- A scribble pad will be provided for rough work. Candidates have to write their name and registration number before using it. The scribble pad has to be returned at the end of the examination.
- The examination will end automatically after the stipulated time.
- Candidates are required to adhere to the code of conduct specified in [Annexure V](#).
- Candidates will also be able to take a mock examination through a 'Mock Test' link that will be made available on the JAM 2023 website. Question Papers of last three years are also available on JAM 2023 website.

5. TEST SCHEDULE AND FEES

The Test Paper schedule of JAM 2023 is given in **Table 1**.

Table 1: JAM 2023 Test Paper Schedule

Examination Date	Session	Test Papers and Codes
February 12, 2023 (Sunday)	Forenoon (FN) 9.30 am to 12.30 pm	Chemistry (CY) Geology (GG) Mathematics (MA)
	Afternoon (AN) 2.30 pm to 5.30 pm	Biotechnology (BT) Economics (EN) Mathematical Statistics (MS) Physics (PH)

A candidate can appear in either **ONE** or **TWO** Test Paper(s). However, a candidate can appear in two Test Papers only if they are not scheduled in the same session (see **Table 1**). The details of the application fee are given in **Table 2**.

Table 2: Application Fee for JAM 2023

Group/Category	Fee Details	
	One Test Paper	Two Test Papers
Female (All Categories) / SC / ST / PwD	₹ 900	₹ 1250
All Others	₹ 1800	₹ 2500

Candidates who have wrongly entered the Category or Gender will be allowed to change the Category or Gender on the application portal available at <https://jam.iitg.ac.in> with an additional fee as per Table 3. All such candidates are required to pay the additional fee online as applicable, on or before October 31, 2022.

Table 3: Additional Fee for Changing Category or Gender

Existing Group/Category	Change	Case	Additional Fee
Female (All Categories) / SC / ST / PwD (Group - 1)	Within Group - 1	One or Two Test Paper(s)	₹ 300
	To Group - 2	One Test Paper	₹ 900
		Both Papers	₹ 1250
All Others (Group - 2)	To Group - 1 or within Group - 2	One or Two Test Paper(s)	₹ 300

After submitting an application, if candidates decide to appear in other Test Paper or to change Test Paper(s), they can ADD THE ADDITIONAL TEST PAPER or can CHANGE THE TEST PAPER(S) in the earlier submitted application form by paying an additional fee online, as per Table 4, on or before October 31, 2022.

Table 4: Additional Fee for Addition or Change of Test Paper(s)

Group / Category	Group / Category	Wishes to Change		Wishes to Add	
		Case	Additional Fee	Case	Additional Fee
Female (All Categories) / SC / ST / PwD	One Test Paper	One Test Paper	₹ 900	One Test Paper	₹ 350
	Two Test Papers	Any One Test Paper	₹ 300	Not Applicable	
		Both Papers	₹ 1250		
All Others	One Test Paper	One Test Paper	₹ 1800	One Test Paper	₹ 700
	Two Test Papers	Any One Test Paper	₹ 600	Not Applicable	
		Both Papers	₹ 2500		

Additional bank charges may apply for the transaction depending on the payment option selected. This charge will be specified on the payment portal. All fees paid are non-refundable.

6. APPLICATION PROCEDURE

Candidates can apply for JAM 2023 only through **JAM Online Application Processing System (JOAPS)** available through <https://jam.iitg.ac.in> from **September 7, 2022 to October 11, 2022**. Candidates have to first register on JOAPS, by providing their **name, a valid e-mail address, an active mobile number and setting a password**. Upon successful registration, candidate's Enrolment ID and OTP will be sent to the e-mail address and mobile number provided by the candidate. The candidate needs to use this Enrolment ID or e-mail address along with the password for submitting the application. **Candidates are advised to keep the Enrolment ID and the password safe and confidential.**

JOAPS provides an online interface to the candidate for interacting with the JAM 2023 Administration. With this interface, a candidate can:

- Apply for the examination online.
- Upload photograph, signature, and other documents like certificate (for SC / ST / PwD)
- Pay the application fee through any of the electronic payment modes.
- Check the status of the application form such as Received, Under scrutiny, Accepted, Defect status, Status after rectification, Rejected with valid reasons, and Admit card ready for download.

Note: (i) Candidates are strongly advised to fill the application form on their own. If someone else is filling the application on behalf of the candidate, the candidate must ensure that the data submitted are correct. (ii) Candidates must give an e-mail address that they use frequently, as all communication to the candidate for JAM 2023 will be sent to this e-mail address. (iii) The candidate must not use somebody else's e-mail address and only one candidate can be registered with one e-mail address. (iv) Similarly, candidates should provide their personal mobile number and are advised to use the same number until the results are declared because most of the communication may also be sent via SMS.

A candidate should submit only one application form even if the candidate wants to appear for two Test Papers. Multiple applications submitted by a candidate are liable for rejection. Hence, **DO NOT submit multiple application forms.**

6.1 Choice of Examination Cities: JAM 2023 Examination will be conducted in eight zones. The names of these eight zones with the list of zone-wise Examination Cities are listed in [Annexure VI](#). Candidates must specify their first, second and third choice of cities at the time of applying for JAM 2023. When the choice of first city is made, then the zone gets determined and the candidates will be able to choose the second and third choice city only from the same zone. If a minimum required number of candidates have not applied at a listed city, then the city may be dropped from the final list, and those candidates will be allotted a centre in the city of their second or third choice. **However, a new city may be added, or an existing city may be removed, or a city that may not be any one of the choices stated by the candidate may be allotted for operational reasons.** Candidates are requested to regularly check JAM 2023 website for updates regarding examination cities, if any. A city once allotted will not normally be changed. An examination city may have one or more examination centres. A request for change of centre within the same city will **NOT** be accepted.

6.2 Data Requirement for Filling the Application Form: The following data will be required while filling the form at JOAPS portal:

- Personal information (name, date of birth, personal mobile number, parent's/guardian's name, parent's/ guardian's mobile number, etc.)

- **Name of the candidate in the application form must exactly be the same as per the qualifying degree certificate.** JAM 2023 Scorecard will be issued as per the name entered in the application form. Prefix/title such as Mr/Shri/Dr/Ms/Mrs/Smt, etc. should NOT be used.
- Address for communication including PIN code
- Details of Eligibility degree
- Name and address with PIN code of the College/Institute/University
- Choice of JAM paper(s)
- Choice of JAM Examination Cities
- High-quality image of the candidate's photograph and signature conforming to the specifications given in **Section 6.3** and **Section 6.4**, respectively
- Scanned copy of the Category (SC/ST) Certificate (if applicable) as per guidelines given in **Section 6.5**
- Scanned copy of Physical Disability Certificate (if applicable) or Unique Disability Identification (UDID) certificate
- Details of the Photo Identity Document (ID). This ID, in original, should be carried by the candidate to the examination center. Candidate can specify any one of the following Photo ID: Aadhaar ID, Driving License, PAN Card, Passport, or Voter ID
- Net-banking / debit card / credit card / UPI details for fee payment

JOAPS allows the candidate to enter the data, "Save" a partially filled form, "Logout", and "Resume Filling" by logging in again. The JOAPS portal is self-explanatory and user-friendly.

The application fee will be automatically determined based on the category, gender, and number of Test Papers that have been opted by the candidate.

6.3 Photograph Requirements

- **Upload only a good quality (not blurred) recent photograph, preferably taken in 2022. JAM 2023 Admit Card and Scorecard will be printed with the photograph that you submit during application.**
- The photograph must be recent and must be in COLOUR. Background of the photograph must be **white** or in a very light colour.
- Photographs of poor resolution taken using a mobile phone and other self-composed portraits may result in the rejection of the application.
- A passport size (3.5 cm Width × 4.5 cm Height) JPEG/JPG format photograph of the face of the candidate is required for the application form.
- **Maximum size of the JPEG/JPG image can be 480 × 640 in pixels.** The minimum pixel size of the JPEG/JPG image should be 240 × 320. The file size of the image should be in the range of 50 KB to 200 KB. Aspect ratio (width: height) has to be between 0.66 and 0.89.
- The face should occupy at least 50% of the area of the photograph with a full-face view looking into the camera directly.
- Forehead, eyes, nose, ears and chin should be clearly visible. These must not be covered by hair, any cloth/facemask or any shadow.
- If you normally wear spectacles, a photograph with glare on glasses is not acceptable. Remove the spectacles if glare cannot be avoided.
- **Do not wear spectacles with dark or tinted glasses; only clear glasses are permitted.**
- Poor quality photograph will lead to rejection of application, without any refund of the application fee.

Table 5A shows samples of acceptable photographs and **Table 5B** shows unacceptable photographs.

6.4 Signature Requirements

- Upload only a good quality (not blurred) image of your signature in black or dark blue ink pen. Size of the signature should be within 2 cm × 7 cm (Height × Width).
- Name written in CAPITAL LETTERS, Initials or signature in any other colour (other than black or dark blue) shall NOT be accepted.
- Use a professional scanner to get the digital image of the signature. Only JPEG/JPG image format will be accepted.
- Maximum size of the JPEG/JPG image of the signature can be 160 × 560 in pixels. Minimum pixel size of the JPEG/JPG image should be 80 × 280. The file size of the image should be in the range of 5 KB to 150 KB. Aspect ratio (width: height) has to be between 3.15 and 4.04.

Table 6A shows samples of acceptable signatures and **Table 6B** shows samples of unacceptable signatures.

6.5 Certificate for SC, ST & PwD

Candidates who belong to SC, ST and/or PwD category have to upload a valid documentary proof for concession in application fees. SC or ST certificate issued ONLY by authorized officials (refer [Annexure VII](#)) shall be valid. Physical Disability Certificate should meet the requirements specified in [Annexure VII](#). Candidates should upload scanned copy of the relevant certificate in pdf format of file size in the range 10 KB to 300 KB. Candidates shall be required to submit the same certificate during Admissions and also to the Admitting Institute.

After filling in the required fields in the application form and uploading the required documents, the candidate must review the application form before final submission and payment.

Any application that is incomplete in any respect and does not have the required valid documents is liable to be rejected. The candidates are advised to visit the '**FAQs**' section on the website: <https://jam.iitg.ac.in> for additional queries.

Table 5A: Samples of Acceptable Photographs

Table 5B: Samples of Unacceptable Photographs

		
Not looking into camera ❌	Improper Background ❌	Wearing Colour glasses ❌
		
Smaller in Size (Standard size is 3.5 cm x 4.5 cm) ❌	Face not covering 50% area ❌	Cropped from other photo ❌
		
Shadow on the face ❌	Face covered with mask ❌	Facial features are not fully visible ❌
		
Glare on spectacles ❌	Wearing hat or cap ❌	Blurred Image ❌

Table 6A: Samples of Acceptable Signatures

	
Harshhar Lahkar	नज़रुल हुसैन
Muralikrishna G.	

Table 6B: Samples of Unacceptable Signatures

	
Signature in dark background ❌	Name in ALL CAPITAL ❌
	
Signature outside the rectangle ❌	Signature in other than blue or black ink ❌
	
Signature outside the rectangle and not aligned horizontally ❌	Signature is too small to view ❌
	
Signature is too hazy ❌	Signature with other background and / or write-up not allowed ❌

6.6 Application Fee Payment Procedure

The application fee as shown in **Table 1** is to be paid online only. Candidates will be able to make the payment using net-banking, debit or credit card or UPI until **October 11, 2022**. Before proceeding for making any payment, applicants should view their application by clicking the **"Save and View"** button. They should carefully check the application and ensure that there are no errors in the application form. They should also ensure that all the relevant and valid documents are uploaded. If there is any mistake, they can edit the relevant fields before proceeding for the payment. After this they should click on **"Proceed for Payment"** button. Once a candidate clicks **"Proceed for Payment"** button, **NO FURTHER CHANGES** in the application form can be made and the candidate will be directed to the payment portal. On the fee payment portal, the fee amount and bank charges will be shown and the candidate has to confirm that the payment is for JAM 2023. Once confirmed and payment is successful, the candidate will be redirected back to the JOAPS Website, where it shows confirmation of the fee payment. If the candidate had selected only ONE Test Paper, there will be an option to choose a second Test Paper. If candidates desire to do so, they can proceed by paying the additional amount for second Test Paper as indicated in Table 1.

If candidates have difficulty in making the fee payment (due to internet connection or power failure, for example) or are not sure whether payment has been processed or not, then they should login to JOAPS after about an hour and check the status of the payment. If the status is **"Fee Pending/Not Paid"** then a fresh online payment through JOAPS may be initiated. If it is not done, the application will be rejected due to non-payment of the application fee in time. In case, the fee amount has been debited from the account of candidate, but JOAPS does not acknowledge any fee payment, then the money will be credited back to the account within ten working days.

In exceptional circumstances, a change of examination city may be permitted. The request for city change should be made after an online payment of ₹ 500 through JOAPS on or before November 12, 2022. Please note that payment of ₹ 500 does not necessarily guarantee the change of the city. The decision of the Organizing Institute, JAM 2023, in this regard will be final.

In case of any queries/problems in filling application form and making the fee payment online, contact the Organizing Institute with the details provided on the website.

6.7 Application Scrutiny and Rectification

Applications shall be scrutinized to verify the data entered by the candidate with the submitted supporting documents, clarity of the photograph and signature. If everything is found to be in order, the application will be accepted. Otherwise, defects in the application will be marked and intimated to the candidate for rectification within a stipulated time. The status of the application and defects marked in the application will be intimated to the candidates through e-mail and/or SMS. The latest status of an application will be updated after the receipt and re-scrutiny of the application. The status of an application can be checked at any point of time by logging in JOAPS.

Candidates should rectify the marked defects in the application before the stipulated deadline. **Failing to rectify the defects within the stipulated time can lead to the application being rejected and no further communication will be entertained in this regard.**

7. Admit Card

An Admit Card, bearing the Candidate's Name, Registration Number, Photograph, Signature and Name(s) and Code(s) of the Test Paper(s) applied, along with the Name and Address of the Test Centre allotted, will be available for download from JOAPS from **January 10, 2023 until the Examination Date**. Admit Cards will not be sent by post/e-mail. The candidate should carefully examine the Admit Card for all the entries made therein. In case of any discrepancy, the candidate should inform through email to jam2023@iitg.ac.in.

A printout of the downloaded Admit Card must be brought to the Test Centre along with the original and valid Photo ID. The candidate has to give the details of this ID proof while filling the online application. No candidate will be permitted to appear in JAM 2023 examination without a valid Admit Card, and a valid and original Photo ID. The Admit Card should be presented for verification.

A copy of the Admit Card of JAM 2023 must be carefully preserved by the Candidate and produced at the time of Admission, if required by the Admitting Institute.

The Organizing Institute may withdraw the permission granted to a candidate to appear in JAM 2023, if it is found later on that the candidate is not eligible to appear in the exam, even though an Admit Card has been issued.

8. JAM 2023 Scorecard and Merit Lists

The results will be declared on **March 22, 2023** on the JAM 2023 website. For each Test Paper, an **All India Rank (AIR)** will be assigned to all candidates based on their performance.

Tie-Breaking: The tie-breaking criterion for awarding the ranks to candidates scoring the same aggregate marks in a Test Paper will be as follows:

Scores in the NAT section followed by the scores in the MSQ section will be used to break the tie. Candidates with higher score will be given better rank. Final tie-breaker will be the date of birth of the candidates. The older candidate gets a higher preference. If this criterion fails to break ties, the concerned candidates will be awarded the same rank.

For each Test Paper, an All India Merit list will be prepared based on AIR. The number of candidates included in the All India Merit List will depend on the total number of seats available in each category (GEN, OBC-NCL, EWS, SC, ST, and PwD) in a given subject. These candidates (henceforth called Qualified Candidates) are eligible to apply for admission to any of the corresponding academic programmes. The JAM 2023 Scorecard (indicating the AIR(s) and the mark(s) obtained by the candidate) will be available for download from the JAM 2023 website from **April 01, 2023 to July 31, 2023** for qualified candidates.

9. Scribe & Compensatory Time for Eligible PwD Candidates

PwD candidates who are visually impaired OR dyslexic (severe) OR have disability in the upper limbs OR have lost fingers / hands thereby preventing them from properly taking the Computer Based Test may avail the services of a scribe in accordance with the Clause IV of the Office Memorandum* issued by the Ministry of Social Justice and Empowerment (and subsequent corrigendum*). The option to utilize the services of a scribe has to be exercised by the candidates during the application stage. If they choose to utilize the services of a scribe, they would also be given an option to specify if they would arrange their own scribe or they would want to be provided with a scribe.

The assistance that the Scribe can render to the candidate is limited to ONLY reading the instructions and test paper displayed on the computer screen verbatim and in assisting with the mouse-clicks, if the candidate is not able to do so. The Scribe shall NOT translate / interpret / emphasize the Test Paper Contents to the Candidate.

*[F.No. 34-02/2015-DD-III dated August 29, 2018](#), [F.No. 34-02/2015-DD-III\(pt\) dated February 8, 2019](#)

9.1 Scribes arranged by Candidates

Candidate and the scribe should certify that the scribe satisfies the government guidelines and qualification of the scribe is one step below the qualification of the candidate taking the examination.

Candidates using their own scribe will have to provide a letter of undertaking in the prescribed proforma (Appendix II of the office order [F.No. 34-02/2015-DD-III dated August 29, 2018](#)).

Scribe must not be a candidate for a test paper in JAM 2023. NO honorarium will be paid to the scribe arranged by the PwD candidate.

If a PwD candidate has opted to bring his/her own scribe but do not do so on the day of examination, then it will not be possible to provide a scribe.

9.2 Scribes arranged by Examination Body

Scribes will be arranged for those PwD candidates who have requested to be provided with a scribe at the time of application.

Qualification of the scribe arranged by test center will NOT be more than the minimum eligibility criteria of JAM 2023. However, the qualification of the scribe will be matriculation (10th) or above.

If there are Y candidates who require scribe, it will be ensured that a panel of (Y+1) scribes is available at the exam centre so that every candidate can have an alternative scribe to choose for the services. Each eligible PwD candidate will be presented with TWO scribes on the day before examination. The candidate has to choose one from these two scribes. Candidates will NOT be permitted to bring their own scribe, if they have already requested to be provided with scribes.

PwD Candidates are permitted to visit the Exam Centre a day before the examination to get familiarized with the arrangements.

9.3 Compensatory Time

Candidates who are eligible to avail the facility of scribe can opt for compensatory time of one hour, for the three-hour examination, even if they do not utilize the services of a scribe. This compensatory time of 60 minutes will be provided automatically, which needs to be checked in the server and candidate's console. PwD candidates who are not eligible for the facility of scribe may be given the compensatory time provided that they submit a certificate during the application to the effect that the candidate concerned has physical limitation to write from the Chief Medical Officer/ Civil Surgeon/ Medical Superintendent of a Government Health Care institution in the prescribed proforma (Appendix I of the office order [F.No. 34-02/2015-DD-III dated August 29, 2018](#)).

If it is found at any stage that a candidate has availed compensatory time and/or the services of a scribe, but does not possess the extent of disability that warrants the same, the candidate will be excluded from the process of evaluation, ranking and admission. In case such a candidate has already been admitted to any IIT, the admission of the candidate will be cancelled.

PwD candidates having disability in terms of vision will be given an option to view the Test Paper on the computer screen in a magnified font.

Note:

- Candidates should note that mere appearance in JAM 2023 or being in the merit list of any Test Paper neither guarantees nor provides any automatic entitlement to admission. Qualified candidates will have to apply for admission as per the prescribed procedure.
- With regard to the interpretation of the provisions on any matter not covered in this Information Brochure, the decision of the Organizing Institute shall be final and binding on all the parties concerned.
- Although JAM 2023 is held at different centres across the country, the Organizing Institute, has the overall responsibility of conducting JAM 2023. In case of any claims or disputes related to JAM 2023, the **Gauhati High Court (Guwahati, Assam)** shall have the exclusive jurisdiction to entertain and settle any such disputes and claims.

10. ADMISSION PROCEDURE

A brief summary of the admission procedure is provided in this section and detailed information including timelines will be given in the Admission Brochure to be published in the second week of March 2023.

Academic Programmes: The list of academic programmes available at the 21 admitting IITs as part of JAM 2023 is given in [Annexure II](#). A qualified candidate can apply to admissions for all eligible programmes with a single application. Candidates who have qualified in multiple Test Papers also need to apply with a single application.

Eligibility Requirements (ERs) & Minimum Educational Qualifications (MEQs): Candidates who have successfully completed an undergraduate degree or currently studying in the final year of undergraduate are eligible for admission through JAM 2023. Proof of having passed the Qualifying Degree with the Minimum Educational Qualifications (MEQs) as specified by the Admitting Institute in [Annexure III](#) should be submitted by **September 1, 2023**. At the time of admission, all admitted candidates may have to submit a Physical Fitness certificate from a registered medical practitioner in the prescribed form to the Admitting Institute. At the time of admission, the admitted candidates may also have to undergo a Physical Fitness test by a medical board constituted by the Admitting Institute. In case candidates are not found physically fit to pursue their chosen programme of study, their admission is liable to be cancelled.

Application for Admission: Subsequent to the announcement of JAM 2023 results, a qualified candidate satisfying the ERs and MEQs seeking admission has to apply online through the JAM 2023 website, irrespective of the 21 IITs where the admission is sought. The candidate needs to provide the required information, such as choice of the programmes in order of preference, educational qualifications, percentage of marks/CGPA, category, PwD status, etc. A payment of ₹ 750 (Rupees Seven hundred and fifty only) is to be made online as non-refundable processing fee. Foreign nationals with Indian degree are eligible to apply, subject to the policy of the Admitting Institute.

Reservations: In each programme, a certain number of seats as detailed in [Annexure II](#) are reserved/allocated for candidates belonging to various categories. Candidates who seek admission under SC or ST category must submit the requisite certificate issued by a competent authority as specified in [Annexure VII](#). Candidates who seek admission under the OBC-NCL or EWS Category must submit an OBC-NCL or EWS Certificate issued by a competent authority as specified in [Annexure VI](#), in the format shown in [Annexure VIII](#) for OBC-NCL and [Annexure IX](#) for EWS. Certificates for OBC-NCL or EWS should have been issued after March 31, 2022. Candidates who seek admission under PwD category must submit a disability certificate (refer [Annexure VI](#)) or Unique Disability Identification (UDID) certificate.

Provisional Admission: A maximum of four rounds of admission will be made to fill the available seats. Candidates who are offered a seat can either (i) accept the offered seat as final with no changes in the subsequent round, or (ii) accept the offered seat in this round with an option to be considered for being upgraded to other programmes, only for which they have given better preferences, in subsequent round(s), if any, or (iii) reject the offer and quit the admission process.

Admission Fee: After the declaration of the Admission List in each round, intimation will be sent by the Organizing Institute to the candidates concerned. Along with the submission of acceptance form, these candidates will also have to pay an advance seat booking fee (₹ 10000 for General/OBC-NCL/EWS category candidates and ₹ 5000 for SC / ST / PwD category candidates) online through JOAPS, within the deadline mentioned in the offer letter. This amount will be transferred to the Admitting Institute and it will be adjusted against the Institute Fee at the time of Registration. Admission can be denied if a candidate does not upload valid requisite documents or does not pay fee in the stipulated time.

Annexure I - SYLLABI FOR TEST PAPERS

TEST PAPER: BIOTECHNOLOGY (BT)

The Biotechnology (BT) Test Paper comprises Biology, Chemistry, Mathematics and Physics.

BIOLOGY (10+2+3 level)

Cell Biology: Structure of prokaryotic and eukaryotic cells; Membrane structure and function; Organelles and internal organization of the eukaryotic cell Protein trafficking in a eukaryotic cell; Cell communication – signalling pathways: endocrine and paracrine signalling; Extracellular matrix and apoptosis; Cell cycle – stages of mitosis and meiosis, and control of cell division cycle.

Biochemistry: Structure and function of biological macromolecules; Allostery; Enzymes – basic mechanisms of enzyme catalysis, Michaelis-Menten kinetics, enzyme inhibition, vitamins as coenzymes, and regulation; Bioenergetics – free-energy change, high-energy compounds, biological oxidation-reduction reactions and reduction potential; Metabolism – glycolysis, TCA cycle, oxidative phosphorylation, photosynthesis, nitrogen fixation, urea cycle, and regulation of glycolysis and TCA cycle.

Genetics: Mendel's laws; Inheritance patterns of polygenic traits; Mendelian inheritance patterns of human disorders; Pedigree analysis; Chromosomal basis of inheritance; Genetic recombination; Mapping genes on chromosomes based on linkage analysis; Plant breeding.

Molecular Biology: Landmark experiments that established DNA is the genetic material; DNA replication; Proof-reading and repair of DNA; DNA recombination; Transcription; RNA processing; Translation; Regulation of gene expression including operons bacteria and differential gene expression in multicellular eukaryotes.

Evolution: Darwinian view – natural selection, fossil record and descent with modification; Population genetics – sources of genetic variation, gene pools and allele frequencies, Hardy-Weinberg equation, genetic drift, gene flow and adaptive evolution; Different types of speciation; Phylogenetic classification; Origin of life – abiotic synthesis of biological macromolecules, protocell, dating fossils and origin of multicellularity.

Microbiology: Isolation; Cultivation; Structural features of viruses, bacteria, fungi and protozoa; Pathogenic microorganisms; Nutrition-based classification of microbes; Microbial metabolism; Growth kinetics; Submerged fermentation techniques; Microbial genetics.

Plant Biology: Types of tissues and organs; Primary and secondary growth; Morphogenesis; Transport in vascular plants; Plant nutrition; Development of flowering plants – gametophytic and sporophytic generations, different developmental phases, genetic control of flowering, gametogenesis, incompatibility, embryogenesis, dormancy, germination and environmental influence; Plant hormones; Photobiology; Plant response to biotic and abiotic stresses

Animal Biology: Digestive, circulatory, respiratory, excretory, nervous, reproductive and endocrine systems; Basics of immunology – Innate and adaptive immunity, Immune cells and Immunoglobulins; Animal development – Fertilization, embryonic pattern formation, cleavage, gastrulation, cellular differentiation and morphogenesis.

Ecology: Climate patterns; Terrestrial and aquatic biomes; Environmental constraints on species distribution; Factors affecting population density; Interactions among communities; Ecosystems; Ecological remediation.

Biotechnology: Plant tissue culture; Cloning of animals through somatic cell nuclear transfer; Applications of recombinant DNA technology in medicine, agriculture and forensic science.

Methods in Biology:

Cell Biology: Microscopy (light microscopy and electron microscopy); Staining proteins with antibodies; Visualizations using the GFP reporter.

Biochemical techniques: UV spectrophotometry; Biomolecular chromatography; cell fractionation by centrifugation; Electrophoresis; and Western blotting.

Molecular biology techniques: DNA cloning – plasmid vectors, and restriction enzymes; Polymerase Chain Reaction; Expression of cloned eukaryotic genes in bacteria; Hybridization techniques; DNA sequencing.

CHEMISTRY (10+2+3 level)

Structure and properties of Atoms: Bohr's theory; Periodicity in properties.

Bonding in molecules: Chemical bonding; Complex formation; Physical and chemical basis of molecular interactions.

Chemical kinetics, thermodynamics, and equilibrium: Chemical equilibrium; Chemical thermodynamics (first and second law); and Chemical kinetics (zero and first order reactions).

Physical and chemical properties of compounds: Chemical catalysis; Acid-base concepts; Concepts of pH and buffer; Conjugative effects and resonance; Inductive effects; Electromeric effects; Photochemistry; and Electrochemistry.

Chemistry of organic compounds: Hydrocarbons; Alkyl halides; Alcohols; Aldehydes; Ketones; Carboxylic acids; Amines and their derivatives; Aromatic hydrocarbons, halides, nitro and amino compounds, phenols, diazonium salts, carboxylic and sulphonic acids; Soaps and detergents; Stereochemistry of carbon compounds.

Instrumental techniques - Spectroscopy: fundamentals of molecular spectroscopy, emission and absorption spectroscopy, UV-Vis, IR and 1-D proton NMR spectroscopy, basics of mass spectrometry; Basics of calorimetry; Basic concepts of crystallography.

MATHEMATICS (10+2 level)

Sets; Relations and Functions; Mathematical Induction; Logarithms; Complex numbers; Linear and Quadratic equations; Sequences and Series; Trigonometry; Cartesian System of Rectangular Coordinates; Straight lines and Family; Three Dimensional Geometry; Permutations and Combinations; Binomial Theorem; Vectors; Matrices and Determinants; Boolean Algebra; Functions; Limits and Continuity; Differentiation; Ordinary Differential Equations; Application of Derivatives; Integration as inverse process of differentiation; Definite and indefinite integrals; Methods of Integration; Integration by parts.

Statistics: Measures of dispersion; Mean Deviation for grouped and ungrouped data; Variance and Standard Deviation; and Analysis of Frequency Distribution.

Probability: Random Experiments; Event; Axiomatic Approach to Probability; Conditional Probability and its properties; Multiplication Theorem on Probability; Independent Events; Bayes' Theorem; Random Variables and its Probability Distributions; Bernoulli Trials and Binomial Distributions.

PHYSICS (10+2 level)

Units and measurements; Motion in one and two dimensions; Laws of motion; Work and kinetic energy; Conservation of energy; System of particles and rotational motion; Mechanical properties of solids and fluids; Thermal properties of matter; Heat and laws of thermodynamics; Kinetic theory of gases; Electric charge and field; Electric potential and capacitance; Current, resistance and simple circuits; Moving charges and magnetic field; Magnetism and matter; Electromagnetic induction; Electromagnetic waves; Alternating currents; Optics: Geometrical Optics – Reflection by spherical mirrors, Refraction at spherical surfaces and lenses, Total internal reflection and Optical instruments; Wave optics – Reflection and refraction of plane waves, Interference, Diffraction, Polarization, and Young's experiment: Dual nature of radiation and matter; Atoms, nuclei and nuclear physics; Semiconductor materials, devices and simple circuits.

TEST PAPER: CHEMISTRY (CY)**Physical Chemistry****Atomic and Molecular Structure:**

Planck's black body radiation, Photoelectric effect, Bohr's theory, de Broglie postulate, Heisenberg's Uncertainty Principle; Schrödinger's wave equation (including mathematical treatment), postulates of quantum mechanics, normalized and orthogonal wave functions, its complex conjugate (idea of complex numbers) and significance of Ψ^2 ; Operators; Particle in one-dimension box, radial and angular wave functions for hydrogen atom, radial probability distribution; Finding maxima of distribution functions (idea of maxima and minima), energy spectrum of hydrogen atom; Shapes of s, p, d and f orbitals; Pauli's Exclusion Principle; Hund's rule of maximum multiplicity.

Gaseous State:

Kinetic molecular model of a gas: collision frequency; collision diameter; mean free path and viscosity of gases; Maxwell-Boltzmann distribution: molecular velocities, law of equipartition of energy, molecular basis of heat capacities; Ideal gases, and deviations from ideal gas behaviour, van der Waals equation of state; critical state, law of corresponding states.

Liquid State:

Physical properties of Liquid, vapour pressure, surface tension and co-efficient of viscosity and their applications; effect of concentration of solutes on surface tension and viscosity; effect of temperature on viscosity of liquids.

Solid State:

Unit Cells, Miller indices, crystal systems and Bravais Lattices, elementary applications of vectors to crystal systems; X-ray diffraction, Bragg's Law, Structure of NaCl, CsCl, and KCl, diamond, and graphite; Close packing in metals and metal compounds, semiconductors, insulators; Defects in crystals, lattice energy; isomorphism; heat capacity of solids.

Chemical Thermodynamics:

Mathematical treatment: Exact and in-exact differentials, partial derivatives, Euler's reciprocity, cyclic rule; Reversible and irreversible processes; Laws of thermodynamics, thermochemistry, thermodynamic functions, such as enthalpy, entropy, and Gibbs free energy, their properties and applications; Partial molar quantities, dependence of thermodynamic parameters on composition, Gibbs Duhem equation, chemical potential and its applications.

Chemical and Phase Equilibria:

Law of mass action; K_p , K_c , K_x and K_n ; Effect of temperature on K ; Le-Chatelier principle; Ionic equilibria in solutions; pH and buffer solutions; Salt hydrolysis; Solubility and solubility product; Acid – base titration curves; Indicators; Dilute solutions; Raoult's and Henry's Laws and their applications; Colligative properties; Gibbs phase rule; Phase equilibria; single and two-component phase diagrams.

Electrochemistry:

Conductivity, equivalent and molar conductivity and their properties; Kohlrausch law; DebyeHückel-Onsager equation; Ionic velocities, mobilities, transference numbers; Applications of conductance measurement; Quantitative aspects of Faraday's laws of electrolysis, applications of electrolysis in metallurgy and industry; Electromotive force of a cell, Nernst equation; Standard electrode potential, Electrochemical series; Concentration cells with and without transference; Applications of EMF measurements including potentiometric titrations.

Chemical Kinetics:

Order and molecularity of a reaction, differential and integrated form of rate expressions - basic ideas of integration and differentiation; Kinetics of opposing, parallel, and consecutive reactions; Steady state approximation in reaction mechanisms; Chain reactions; Uni-molecular reaction (Lindemann mechanism); Temperature dependence of reaction rates, Arrhenius equation; activation energy; Collision theory of reaction rates; Types of catalysts, specificity and selectivity, mechanisms of catalyzed reactions at solid surfaces; Enzyme catalysis (Michaelis-Menten mechanism, Double reciprocal plot), Acid-base catalysis.

Adsorption:

Gibbs adsorption equation; adsorption isotherm; types of adsorption; surface area of adsorbents; surface films on liquids.

Spectroscopy:

Beer-Lambert's law; fundamental concepts of rotational, vibrational, electronic and magnetic resonance spectroscopy.

Organic Chemistry

Basic Concepts in Organic Chemistry and Stereochemistry:

Electronic effects (resonance, inductive, hyperconjugation) and steric effects and its applications (acid/base property); optical isomerism in compounds with and without any stereocenters (allenes, biphenyls); conformation of acyclic systems (substituted ethane/n-propane/n-butane) and cyclic systems, substituted cyclohexanes, and polycyclic (*cis* and *trans* decalins) systems.

Organic Reaction Mechanism and Synthetic Applications:

Chemistry of reactive intermediates (carbocations, carbanions, free radicals, carbenes, nitrenes, benzynes); nucleophilic substitution, elimination reactions and mechanisms; Hofmann-Curtius-Lossen rearrangement, Wolff rearrangement, Simmons-Smith reaction, Reimer-Tiemann reaction, Michael reaction, Darzens reaction, Wittig reaction and McMurry reaction; Pinacolpinacolone, Favorskii, benzoic acid rearrangement, Baeyer-Villiger reaction; oxidation and reduction reactions in organic chemistry; Organometallic reagents in organic synthesis (Grignard, organolithium, organocopper and organozinc (Reformatsky only)); Diels-Alder, electrocyclic and sigmatropic reactions; functional group inter-conversions and structural problems using chemical reactions.

Qualitative Organic Analysis:

Identification of functional groups by chemical tests; elementary UV, IR and ^1H NMR spectroscopic techniques as tools for structural elucidation of simple organic molecules.

Natural Products Chemistry:

Chemistry of alkaloids, steroids, terpenes, carbohydrates, amino acids, peptides and nucleic acids.

Aromatic and Heterocyclic Chemistry:

Monocyclic, bicyclic and tricyclic aromatic hydrocarbons, and monocyclic compounds with one hetero atom: synthesis, reactivity and properties, aromaticity; Electrophilic and nucleophilic aromatic substitution reactions.

Inorganic Chemistry

Periodic Table:

Periodic classification of elements, Aufbau's principle, periodicity; Variations of orbital energy, effective nuclear charge, atomic, covalent, and ionic radii, ionization enthalpy, electron gain enthalpy, and electronegativity with atomic number, electronic configuration of diatomic molecules (first and second row elements).

Extractions of Metals:

General methods of isolation and purification of elements; Principles and applications of Ellingham diagram.

Chemical Bonding and shapes of molecules:

Ionic bond: Packing of ions in crystals, radius ratio rule, Born-Landé equation, Kapustinskii expression, Madelung constant, Born-Haber cycle, solvation energy, polarizing power and polarizability; Fajan's rules; Covalent bond: Lewis structure, valence bond theory. Hybridization, molecular orbital theory, molecular orbital diagrams of diatomic and simple polyatomic molecules and ions; Multiple bonding (σ and π bond approach) and bond lengths; van der Waals forces, ion-dipole forces, dipole-dipole interactions, induced dipole interactions, instantaneous dipole-induced dipole interactions, hydrogen bonding; Effect of intermolecular forces on melting and boiling points, solubility energetics of dissolution process; Bond dipole, dipole moment, and molecular polarizabilities; VSEPR theory and shapes of molecules; ionic solids.

Main Group Elements (s and p blocks):

Reactions of alkali and alkaline earth metals with oxygen, hydrogen and water; Alkali and alkaline earth metals in liquid ammonia; Gradation in properties of main group element in a group; Inert pair effect; Synthesis, structure and properties of diborane, ammonia, silane, phosphine and hydrogen sulphide; Allotropes of carbon; Oxides of nitrogen, phosphorus and sulphur; Oxoacids of phosphorus, sulphur and chlorine; Halides of silicon and phosphorus; Synthesis and properties of borazine, silicone and phosphazene; Synthesis and reactions of xenon fluorides.

Transition Metals (d block):

Characteristics of d-block elements; oxide, hydroxide and salts of first row metals; coordination complexes: structure, isomerism, reaction mechanism and electronic spectra; VB, MO and crystal field theoretical approaches for structure, color and magnetic properties of metal complexes; Organometallic compounds with metal-ligand single and multiple bonds (such as metal carbonyls, metal nitrosyls and metallocenes); Homogenous catalysis involving Wilkinson's catalyst.

Bioinorganic Chemistry:

Essentials and trace elements of life; basic reactions in the biological systems and the role of metal ions, especially Fe^{2+} , and Zn^{2+} ; structure and function of myoglobin, hemoglobin and carbonic anhydrase.

Instrumental Methods of Analysis:

Basic principles; instrumentations and simple applications of conductometry, potentiometry and UV-vis spectrophotometry; analyses of water, air and soil samples.

Analytical Chemistry:

Principles of qualitative and quantitative analysis; Acid-base, oxidation-reduction and complexometric titrations using EDTA; Precipitation reactions; Use and types of indicators; Use of organic reagents in inorganic analysis; Radioactivity, nuclear reactions, applications of isotopes; Mathematical treatment in error analysis, elementary statistics and probability theory.

TEST PAPER: ECONOMICS (EN)**Microeconomics**

Consumer theory: Preference, utility and representation theorem, budget constraint, choice, demand (ordinary and compensated), Slutsky equation, revealed preference axioms

Theory of production and cost: Production technology, isoquants, production function with one and more inputs, returns to scale, short run and long run costs, cost curves in the short run and long run

General equilibrium and welfare: Equilibrium and efficiency under pure exchange and production, welfare economics, theorems of welfare economics

Market structure: Perfect competition, monopoly, pricing with market power, price discrimination (first, second and third), monopolistic competition and oligopoly

Game theory: Strategic form games, iterated elimination of dominated strategies, Nash equilibrium, mixed extension and mixed strategy Nash equilibrium, examples: Cournot, Bertrand duopolies, Prisoner's dilemma

Public goods and market failure: Externalities, public goods and markets with asymmetric information (adverse selection and moral hazard)

Macroeconomics

National income accounting: Structure, key concepts, measurements, and circular flow of income - for closed and open economy, money, fiscal and foreign sector variables - concepts and measurements

Behavioural and technological functions: Consumption functions - absolute income hypothesis, life-cycle and permanent income hypothesis, random walk model of consumption, investment functions - Keynesian, money demand and supply functions, production function

Business cycles and economic models (closed economy): Business cycles-facts and features, the Classical model of the business cycle, the Keynesian model of the business cycle, simple Keynesian cross model of income and employment determination and the multiplier (in a closed economy), IS-LM Model, Hicks' IS-LM synthesis, role of monetary and fiscal policies

Business cycles and economic models (open economy): Open economy, Mundell-Fleming model, Keynesian flexible price (aggregate demand and aggregate supply) model, role of monetary and fiscal policies

Inflation and unemployment: Inflation - theories, measurement, causes, and effects, unemployment - types, measurement, causes, and effects

Growth models: Harrod-Domar, Solow and Neo-classical growth models (AK model, Romer model and Schumpeterian growth model)

Statistics for Economics

Probability theory: Sample space and events, axioms of probability and their properties, conditional probability and Bayes' rule, independent events, random variables and probability distributions, expectation, variance and higher order moments, functions of random variables, properties of commonly used discrete and continuous distributions, density and distribution functions for jointly distributed random variables, mean and variance of jointly distributed random variables, covariance and correlation coefficients

Mathematical statistics: Random sampling, types of sampling, point and interval estimation, estimation of population parameters using methods of moments and maximum likelihood procedures, properties of estimators, sampling distribution, confidence intervals, central limit theorem, law of large number

Hypothesis testing: distributions of test statistics, testing hypotheses related to population parameters, Type I and Type II errors, the power of a test, tests for comparing parameters from two samples

Correlation and regression: Correlation and types of correlation, the nature of regression analysis, method of Ordinary Least Squares (OLS), CLRM assumptions, properties of OLS, goodness of fit, variance and covariance of OLS estimator

Indian Economy

Indian economy before 1950: Transfer of tribute, deindustrialization of India

Planning and Indian development: Planning models, relation between agricultural and industrial growth, challenges faced by Indian planning

Indian economy after 1991: Balance of payments crisis in 1991, major aspects of economic reforms in India after 1991, reforms in trade and foreign investment

Banking, finance and macroeconomic policies: aspects of banking in India, CRR and SLR, financial sector reforms in India, fiscal and monetary policy, savings and investment rates in India

Inequalities in social development: India's achievements in health, education and other social sectors, disparities between Indian States in human development

Poverty: Methodology of poverty estimation, Issues in poverty estimation in India

India's labour market: unemployment, labour force participation rates

Mathematics for Economics

Preliminaries and functions: Set theory and number theory, elementary functions: quadratic, polynomial, power, exponential, logarithmic, functions of several variables, graphs and level curves, convex set, concavity and quasiconcavity of function, convexity and quasi-convexity of functions, sequences and series: convergence, algebraic properties and applications, complex numbers and its geometrical representation, De Moivre's theorem and its application

Differential calculus: Limits, continuity and differentiability, mean value theorems, Taylor's theorem, partial differentiation, gradient, chain rule, second and higher order derivatives: properties and applications, implicit function theorem, and application to comparative statics problems, homogeneous and homothetic functions: characterisations and applications

Integral calculus: Definite integrals, fundamental theorems, indefinite integrals and applications

Differential equations, and difference equations: First order difference equations, first order differential equations and applications

Linear algebra: Matrix representations and elementary operations, systems of linear equations: properties of their solution, linear independence and dependence, rank, determinants, eigenvectors and eigenvalues of square matrices, symmetric matrices and quadratic forms, definiteness and semidefiniteness of quadratic forms

Optimization: Local and global optima: geometric and calculus-based characterisations, and applications, multivariate optimization, constrained optimization and method of Lagrange multiplier, second order condition of optima, definiteness and optimality, properties of value function: envelope theorem and applications, linear programming: graphical solution, matrix formulation, duality, economic interpretation.

TEST PAPER: GEOLOGY (GG)

The Planet Earth: Origin of the Solar System and the Earth; Geosphere and the composition of the Earth; Shape and size of the Earth; Earth-Moon system; Dating rocks and age of the Earth; Volcanism and volcanic landforms; Interior of the Earth; Earthquakes; Earth's magnetism and gravity, Isostasy; Basic elements of Plate Tectonics; Orogenic cycles.

Geomorphology: Weathering and erosion; Soil formation; Transportation and deposition by wind, ice, river, sea and resulting landforms.

Structural Geology: Orientation of planes and lines in space – concept of dip, strike, rake and plunge. Contour lines; Rule of 'V's and outcrop patterns; Interpretation of geological maps and cross-section construction; Classification and origin of folds, faults, joints, unconformities, foliations and lineations; Stereographic and equal-area projections of planes and lines; Numerical problems related to outcrop and bore-hole data.

Paleontology: Major steps in the evolution of life forms; Fossils, their mode of preservation and utility in age determination and paleoenvironmental interpretations; Morphology, major evolutionary trends and ages of important groups of animals – Brachiopoda, Mollusca, Trilobita, Graptolitoidea, Anthozoa, Echinodermata; Gondwana plant fossils; Elementary idea of vertebrate fossils in India.

Stratigraphy: Principles of stratigraphy; Litho-, Chrono- and biostratigraphic classification; Stratigraphic correlation techniques; Archaean cratons of Peninsular India (Dharwar, Singhbhum and Aravalli); Proterozoic mobile belts; Stratigraphy of Cuddapah and Vindhyan basins; Stratigraphy of Paleozoic – Mesozoic of Spiti and Kashmir, Gondwana Supergroup, Jurassic of Kutch, Cretaceous of Trichinopoly, Tertiary and Quaternary sequences of Assam, Bengal and Siwaliks.

Mineralogy: Symmetry and forms in common crystal classes; Physical properties of minerals; Isomorphism, polymorphism, solid solution and exsolution; Classification of minerals; Structure of silicates; Mineralogy of common rock-forming minerals; Elements of Optical Mineralogy, Optical properties of common rock-forming minerals.

Petrology: Definition and classification of rocks; Igneous rocks – forms of igneous bodies; Processes of evolution and diversification of magma; Classification, association, and genesis of common igneous rocks. Sedimentary rocks – classification, texture, and structure; Petrology of sandstone and limestone; Elements of sedimentary environments and facies. Metamorphic rocks – classification and texture; Types of metamorphism; Controls on metamorphism – pressure, temperature and fluids; Concept of projections – ACF, AKF and AFM diagrams; Phase Rule and its applications; Concepts of zones and facies, Characteristic mineral assemblages of pelites in the Barrovian zones and mafic rocks in common facies.

Economic Geology: Physical properties of common economic minerals; General processes of formation of mineral deposits; Mode of occurrence and distribution of metallic and non-metallic mineral deposits in India; Fundamentals of reserve calculation; Elements of coal and hydrocarbon geology, Coal and hydrocarbon occurrences in India.

Applied Geology: Groundwater and hydrological cycle, Types of aquifers, porosity and permeability; Principles of engineering geology; Geological considerations in construction of dams and tunnels.

TEST PAPER: MATHEMATICS (MA)**Real Analysis:**

Sequences and Series of Real Numbers: convergence of sequences, bounded and monotone sequences, Cauchy sequences, Bolzano-Weierstrass theorem, absolute convergence, tests of convergence for series – comparison test, ratio test, root test; Power series (of one real variable), radius and interval of convergence, term-wise differentiation and integration of power series.

Functions of One Real Variable: limit, continuity, intermediate value property, differentiation, Rolle's Theorem, mean value theorem, L'Hospital rule, Taylor's theorem, Taylor's series, maxima and minima, Riemann integration (definite integrals and their properties), fundamental theorem of calculus.

Multivariable Calculus and Differential Equations:

Functions of Two or Three Real Variables: limit, continuity, partial derivatives, total derivative, maxima and minima.

Integral Calculus: double and triple integrals, change of order of integration, calculating surface areas and volumes using double integrals, calculating volumes using triple integrals.

Differential Equations: Bernoulli's equation, exact differential equations, integrating factors, orthogonal trajectories, homogeneous differential equations, method of separation of variables, linear differential equations of second order with constant coefficients, method of variation of parameters, Cauchy-Euler equation.

Linear Algebra and Algebra:

Matrices: systems of linear equations, rank, nullity, rank-nullity theorem, inverse, determinant, eigenvalues, eigenvectors.

Finite Dimensional Vector Spaces: linear independence of vectors, basis, dimension, linear transformations, matrix representation, range space, null space, rank-nullity theorem.

Groups: cyclic groups, abelian groups, non-abelian groups, permutation groups, normal subgroups, quotient groups, Lagrange's theorem for finite groups, group homomorphisms.

TEST PAPER: MATHEMATICAL STATISTICS (MS)

The Mathematical Statistics (MS) Test Paper comprises following topics of Mathematics (about 30% weight) and Statistics (about 70% weight).

Mathematics

Sequences and Series of real numbers: Sequences of real numbers, their convergence, and limits. Cauchy sequences and their convergence. Monotonic sequences and their limits. Limits of standard sequences. Infinite series and its convergence, and divergence. Convergence of series with non-negative terms. Tests for convergence and divergence of a series. Comparison test, limit comparison test, D'Alembert's ratio test, Cauchy's n^{th} root test, Cauchy's condensation test and integral test. Absolute convergence of series. Leibnitz's test for the convergence of alternating series. Conditional convergence. Convergence of power series and radius of convergence.

Differential Calculus of one and two real variables: Limits of functions of one real variable. Continuity and differentiability of functions of one real variable. Properties of continuous and differentiable functions of one real variable. Rolle's theorem and Lagrange's mean value theorems. Higher order derivatives, Leibnitz's rule and its applications. Taylor's theorem with Lagrange's and Cauchy's form of remainders. Taylor's and Maclaurin's series of standard functions. Indeterminate forms and L' Hospital's rule. Maxima and minima of functions of one real variable, critical points, local maxima and minima, global maxima and minima, and point of inflection. Limits of functions of two real variables. Continuity and differentiability of functions of two real variables. Properties of continuous and differentiable functions of two real variables. Partial differentiation and total differentiation. Leibnitz's rule for successive differentiation. Maxima and minima of functions of two real variables. Critical points, Hessian matrix, and saddle points. Constrained optimization techniques (with Lagrange multiplier).

Integral Calculus: Fundamental theorems of integral calculus (single integral). Leibnitz's rule and its applications. Differentiation under integral sign. Improper integrals. Beta and Gamma integrals: properties and relationship between them. Double integrals. Change of order of integration. Transformation of variables. Applications of definite integrals. Arc lengths, areas and volumes.

Matrices and Determinants: Vector spaces with real field. Subspaces and sum of subspaces. Span of a set. Linear dependence and independence. Dimension and basis. Algebra of matrices. Standard matrices (Symmetric and Skew Symmetric matrices, Hermitian and Skew Hermitian matrices, Orthogonal and Unitary matrices, Idempotent and Nilpotent matrices). Definition, properties and applications of determinants. Evaluation of determinants using transformations. Determinant of product of matrices. Singular and non-singular matrices and their properties. Trace of a matrix. Adjoint and inverse of a matrix and related properties. Rank of a matrix, row-rank, column-rank, standard theorems on ranks, rank of the sum and the product of two matrices. Row reduction and echelon forms. Partitioning of matrices and simple properties. Consistent and inconsistent system of linear equations. Properties of solutions of system of linear equations. Use of determinants in solution to the system of linear equations. Cramer's rule. Characteristic roots and Characteristic vectors. Properties of characteristic roots and vectors. Cayley Hamilton theorem.

Statistics

Probability: Random Experiments. Sample Space and Algebra of Events (Event space). Relative frequency and Axiomatic definitions of probability. Properties of probability function. Addition theorem of probability function (inclusion exclusion principle). Geometric probability. Boole's and Bonferroni's inequalities. Conditional probability and Multiplication rule. Theorem of total probability and Bayes' theorem. Pairwise and mutual independence of events.

Univariate Distributions: Definition of random variables. Cumulative distribution function (c.d.f.) of a random variable. Discrete and Continuous random variables. Probability mass function (p.m.f.) and Probability density function (p.d.f.) of a random variable. Distribution (c.d.f., p.m.f., p.d.f.) of a function of a random variable using transformation of variable and Jacobian method. Mathematical expectation and moments. Mean, Median, Mode, Variance, Standard deviation, Coefficient of variation, Quantiles, Quartiles, Coefficient of Variation, and measures of Skewness and Kurtosis of a probability

distribution. Moment generating function (m.g.f.), its properties and uniqueness. Markov and Chebyshev inequalities and their applications.

Standard Univariate Distributions: Degenerate, Bernoulli, Binomial, Negative binomial, Geometric, Poisson, Hypergeometric, Uniform, Exponential, Double exponential, Gamma, Beta (of first and second type), Normal and Cauchy distributions, their properties, interrelations, and limiting (approximation) cases.

Multivariate Distributions: Definition of random vectors. Joint and marginal c.d.f.s of a random vector. Discrete and continuous type random vectors. Joint and marginal p.m.f., joint and marginal p.d.f.. Conditional c.d.f., conditional p.m.f. and conditional p.d.f.. Independence of random variables. Distribution of functions of random vectors using transformation of variables and Jacobian method. Mathematical expectation of functions of random vectors. Joint moments, Covariance and Correlation. Joint moment generating function and its properties. Uniqueness of joint m.g.f. and its applications. Conditional moments, conditional expectations and conditional variance. Additive properties of Binomial, Poisson, Negative Binomial, Gamma and Normal Distributions using their m.g.f..

Standard Multivariate Distributions: Multinomial distribution as a generalization of binomial distribution and its properties (moments, correlation, marginal distributions, additive property). Bivariate normal distribution, its marginal and conditional distributions and related properties.

Limit Theorems: Convergence in probability, convergence in distribution and their inter relations. Weak law of large numbers and Central Limit Theorem (i.i.d. case) and their applications.

Sampling Distributions: Definitions of random sample, parameter and statistic. Sampling distribution of a statistic. **Order Statistics:** Definition and distribution of the r^{th} order statistic (d.f. and p.d.f. for i.i.d. case for continuous distributions). Distribution (c.d.f., p.m.f., p.d.f.) of smallest and largest order statistics (i.i.d. case for discrete as well as continuous distributions). **Central Chi-square distribution:** Definition and derivation of p.d.f. of central χ^2 distribution with n degrees of freedom (d.f.) using m.g.f.. Properties of central χ^2 distribution, additive property and limiting form of central χ^2 distribution. **Central Student's t -distribution:** Definition and derivation of p.d.f. of Central Student's t -distribution with n d.f., Properties and limiting form of central t -distribution. **Snedecor's Central F -distribution:** Definition and derivation of p.d.f. of Snedecor's Central F -distribution with (m, n) d.f.. Properties of Central F -distribution, distribution of the reciprocal of F -distribution. Relationship between t , F and χ^2 distributions.

Estimation: Unbiasedness. Sufficiency of a statistic. Factorization theorem. Complete statistic. Consistency and relative efficiency of estimators. Uniformly Minimum variance unbiased estimator (UMVUE). Rao-Blackwell and Lehmann-Scheffe theorems and their applications. Cramer-Rao inequality and UMVUEs. **Methods of Estimation:** Method of moments, method of maximum likelihood, invariance of maximum likelihood estimators. Least squares estimation and its applications in simple linear regression models. Confidence intervals and confidence coefficient. Confidence intervals for the parameters of univariate normal, two independent normal, and exponential distributions.

Testing of Hypotheses: Null and alternative hypotheses (simple and composite), Type-I and Type-II errors. Critical region. Level of significance, size and power of a test, p-value. Most powerful critical regions and most powerful (MP) tests. Uniformly most powerful (UMP) tests. Neyman Pearson Lemma (without proof) and its applications to construction of MP and UMP tests for parameter of single parameter parametric families. Likelihood ratio tests for parameters of univariate normal distribution.

TEST PAPER: PHYSICS (PH)

Mathematical Methods: Calculus of single and multiple variables, partial derivatives, Jacobian, imperfect and perfect differentials, Taylor expansion, Fourier series. Vector algebra, Vector Calculus, Multiple integrals, Divergence theorem, Green's theorem, Stokes' theorem. First order equations and linear second order differential equations with constant coefficients. Matrices and determinants, Algebra of complex numbers.

Mechanics and General Properties of Matter: Newton's laws of motion and applications, Velocity and acceleration in Cartesian, polar and cylindrical coordinate systems, uniformly rotating frame, centrifugal and Coriolis forces, Motion under a central force, Kepler's laws, Gravitational Law and field, Conservative and non-conservative forces. System of particles, Center of mass, equation of motion of the CM, conservation of linear and angular momentum, conservation of energy, variable mass systems. Elastic and inelastic collisions. Rigid body motion, fixed axis rotations, rotation and translation, moments of Inertia and products of Inertia, parallel and perpendicular axes theorem. Principal moments and axes. Kinematics of moving fluids, equation of continuity, Euler's equation, Bernoulli's theorem.

Oscillations, Waves and Optics: Differential equation for simple harmonic oscillator and its general solution. Superposition of two or more simple harmonic oscillators. Lissajous figures. Damped and forced oscillators, resonance. Wave equation, traveling and standing waves in one-dimension. Energy density and energy transmission in waves. Group velocity and phase velocity. Sound waves in media. Doppler Effect. Fermat's Principle. General theory of image formation. Thick lens, thin lens and lens combinations. Interference of light, optical path retardation. Fraunhofer diffraction. Rayleigh criterion and resolving power. Diffraction gratings. Polarization: linear, circular and elliptic polarization. Double refraction and optical rotation.

Electricity and Magnetism: Coulomb's law, Gauss's law. Electric field and potential. Electrostatic boundary conditions, Solution of Laplace's equation for simple cases. Conductors, capacitors, dielectrics, dielectric polarization, volume and surface charges, electrostatic energy. Biot-Savart law, Ampere's law, Faraday's law of electromagnetic induction, Self and mutual inductance. Alternating currents. Simple DC and AC circuits with R, L and C components. Displacement current, Maxwell's equations and plane electromagnetic waves, Poynting's theorem, reflection and refraction at a dielectric interface, transmission and reflection coefficients (normal incidence only). Lorentz Force and motion of charged particles in electric and magnetic fields.

Kinetic Theory, Thermodynamics: Elements of Kinetic theory of gases. Velocity distribution and Equipartition of energy. Specific heat of Mono-, di- and tri-atomic gases. Ideal gas, van-der-Waals gas and equation of state. Mean free path. Laws of thermodynamics. Zeroth law and concept of thermal equilibrium. First law and its consequences. Isothermal and adiabatic processes. Reversible, irreversible and quasi-static processes. Second law and entropy. Carnot cycle. Maxwell's thermodynamic relations and simple applications. Thermodynamic potentials and their applications. Phase transitions and Clausius-Clapeyron equation. Ideas of ensembles, Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein distributions.

Modern Physics: Inertial frames and Galilean invariance. Postulates of special relativity. Lorentz transformations. Length contraction, time dilation. Relativistic velocity addition theorem, mass energy equivalence. Blackbody radiation, photoelectric effect, Compton effect, Bohr's atomic model, X-rays. Wave-particle duality, Uncertainty principle, the superposition principle, calculation of expectation values, Schrödinger equation and its solution for one, two and three dimensional boxes. Solution of Schrödinger equation for the one dimensional harmonic oscillator. Reflection and transmission at a

step potential, Pauli exclusion principle. Structure of atomic nucleus, mass and binding energy. Radioactivity and its applications. Laws of radioactive decay.

Solid State Physics, Devices and Electronics: Crystal structure, Bravais lattices and basis. Miller indices. X-ray diffraction and Bragg's law; Intrinsic and extrinsic semiconductors, variation of resistivity with temperature. Fermi level. p-n junction diode, I-V characteristics, Zener diode and its applications, BJT: characteristics in CB, CE, CC modes. Single stage amplifier, two stage R-C coupled amplifiers. Simple Oscillators: Barkhausen condition, sinusoidal oscillators. OPAMP and applications: Inverting and non-inverting amplifier. Boolean algebra: Binary number systems; conversion from one system to another system; binary addition and subtraction. Logic Gates AND, OR, NOT, NAND, NOR exclusive OR; Truth tables; combination of gates; de Morgan's theorem.

Annexure V - Code of Conduct

All candidates appearing for the JAM 2023 must strictly comply with the following Rules and Regulations:

- Candidates appearing for the examination must carry their Admit Card and Original Valid Photo-Identity Proof to the examination hall.
- The candidate's fingerprint and/or photograph may be captured before the examination. This captured data will be used for verification during admission. Hence, candidates should avoid any coating (e.g., ink, mehendi, henna, or tattoo) on their fingertips and have clean fingers on the examination day.
- Carrying mobile phones (even in the switched-off mode), smart watches, calculators, and other electronic gadgets inside the examination hall is strictly prohibited.
- Carrying any other electronic devices that can be used for communication or for any other purpose, and printed, scanned or hand-written materials, inside the examination hall is strictly prohibited.
- All means of communication (verbal or otherwise) among the candidates inside the examination hall are strictly prohibited.
- Candidates should not tamper the computer and the related hardware provided in the examination hall. Candidates found to have tampered these willfully, will have their candidature cancelled.
- Use of unfair means by a candidate in JAM 2023, whether detected at the time of examination, or at any other stage, will lead to the cancellation of candidature as well as disqualification of the candidate from appearing in JAM in future. In addition, appropriate legal action will be initiated against such candidates.
